National Library Week Events

Join the Medical Library and the Medical Resource Center in celebrating National Library Week (April 10-16).

No reservations or commitments required, just show up!

All Week

3D Scanner and Printer demonstrations, Medical Library

Confronting Violence: Improving Women's Lives: traveling exhibit, Medical Library

SOM-Carbondale Creative Exhibit: Medical Resource Center

Friday, April 15, 2016, Noon to 1:30

Lightning Talks (10 minute presentations followed by 5 minute Q&A), Medical Library; light lunch provided:

12:00-12:15: Are You Ready to Flip (your classroom)?

Shelley Tischkau, Ph.D., Department of Pharmacology

12:15-12:30: Publishing a Video Article in JoVE (Journal of Visualized Experiments),

Brandon Cox, Ph.D., Department of Pharmacology

12:30-12:45: Is There a Podcast in Your Future? Lydia Howes, MSI, Department

of Information and Communication Sciences

12:45-1:00: SIU's Open Access Policy: What's in it for you? Geoff Pettys, MA, MSLIS, Department of Information and Communication Sciences

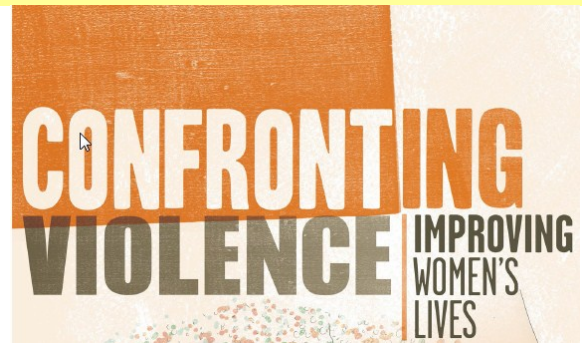

1:00-1:30: Ask the Tech: Questions and Answers on Exchange/Outlook, John Morgan and Andrew Johnson, Information Technology, Stevenson Conference Room and Lindegren 310

Confronting Violence: Improving Women's Lives

A new National Library of Medicine traveling exhibit will be on display in the Medical Library April 11 - May 21.

Confronting Violence: Improving Women's Lives highlights the role of nurses whose research, persistence and dedication helped to put domestic violence towards women on the map as a national public health concern.

Coming this Summer!

from **DNA** to **BEER** Harnessing Nature in Medicine & Industry

Another NLM traveling exhibit, **From DNA to Beer: Harnessing Nature in Medicine and Industry**, will be featured in the library from July 25 - September 4, 2016.

Learn about some of the processes, problems, and potential inherent in technologies that use microorganisms for health and commercial purposes.

"Content hosted on OpenSIUC is available free of charge to anyone in the world "

OpenSIUC Institutional Repository

SIU's Open Access Policy for faculty scholarship requires public availability of all peer-reviewed manuscripts by SIU faculty that have been accepted in scholarly journals.

To that end, SIU libraries maintain an Institutional Repository (IR) called OpenSIUC.

Advantages of OpenSIUC

- Increases discoverability by boosting search engine results for articles.
- Authors have more control over the metadata

that will lead users to their work.

- Monthly reports tell authors how often and from where their work is being accessed.

Who can deposit?

Although SIU's Open Access Policy applies only to faculty, all university staff and students are encouraged to contribute their work to OpenSIUC.

What can be deposited?

The work does not have to be published - it can be a

working paper, a conference paper, a dissertation, thesis, etc. Audio clips, videos, photos, and other media can also be hosted on OpenSIUC.

Content hosted on OpenSIUC is available free of charge to anyone in the world with an internet connection at <http://opensiuc.lib.siu.edu>.

If you are interested in learning more about OpenSIUC, please contact Geoff Pettys at gpettys31@siumed.edu.

Good Reads via an app: bX Hot Articles by Ex Libris

In lieu of appropriate books to highlight, we turn to apps instead.

What are the "hottest" scholarly articles in in business, law, medicine, nursing, psychology, the sciences, the social sciences, and other major academic fields?

Find out with the free **bX Hot Articles** app for both Apple and Android mobile devices.

See which scholarly articles in each field were the most popular among researchers in recent weeks.

Link to electronic full text, taking advantage of the SIU Medical Library's subscriptions.

Send articles by e-mail.

Receive notification whenever the list is updated.

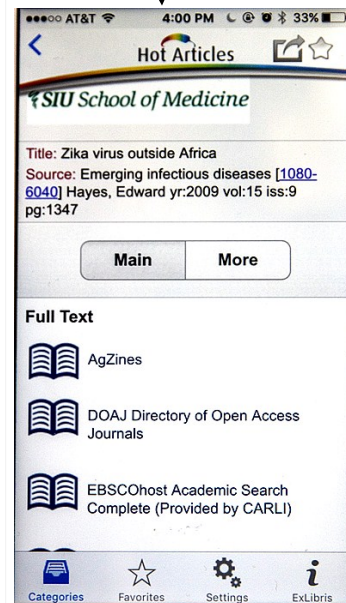

Medicine topics include the following:

→ Diet & Clinical Nutrition

- Internal Medicine
- Obstetrics & Gynecology
- OT & PT
- Pediatrics
- Pharmacy, Therapeutics & Pharmacology
- Psychiatry
- Public Health

Highlighted Resources: Screencast App Smackdown

We've tried out a few screencasting apps to see how they measure up. All could be used to make short, quick instructional videos.

Educreations Interactive Whiteboard (iOS) - Virtual whiteboard with video and voice recording.

Cost: Basic app is free. Buy premium for more features.

Pros:

Record your voice, handwriting and drawings.

Snap a photo from within the app or import images from your photos, Dropbox, Google Drive, or the Web. Paid version can import docs and maps.

Animate images and text by tapping and dragging while recording.

Cons: Rudimentary video editing only lets you trim from the end.

Bottom Line: Easy to use, good for creating presentations on the fly, but get your narration right on the first try due to limited editing.

Doceri (iOS)- Interactive whiteboard and screencast recorder available for iPad.

Cost: All app features are free. (Desktop program- which allows your device to project, control, and annotate your computer screen- costs money)

Pros:

Includes a variety of background colors & designs.

Import your own pictures.

Lots of drawing tools - shapes, text, and a variety of pen colors and thickness.

Save video as mp4, send to YouTube, or save slides as PDFs.

Cons:

Version for Windows devices doesn't include screen recording.

Not available for Android.

Bottom Line: Fantastic, free option for iOS users, but Android users will need to find a different option.

Lensoo Create (Android) - Virtual whiteboard with video and voice recording.

Cost: Basic app is free. Buy premium for more features.

Pros:

Includes a variety of background colors & designs

Import your own pictures.

Lots of drawing tools - shapes, text, and a variety of pen colors and thickness.

Free version allows 15 minutes of recording. Pay for premium for longer videos, more background images, and shapes.

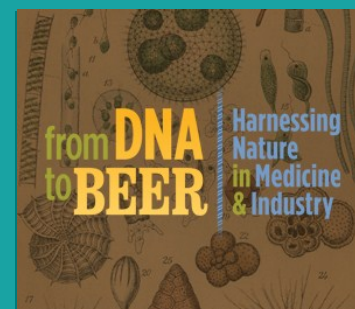

Can upload video to lensoo.com or save slides as PDFs.

Cons:

Can't download your video.

Bottom Line: Free whiteboard app with robust recording features, which is a unicorn in the Android marketplace, but we wish it were possible to download your final product.

"All could be used to make short, quick instructional videos"

WANTED: HOME MICROBE-MASTERS!

The library is searching for home brewers, sourdough and yogurt cultivators, and other experts in home (and edible) microbe – based “technologies” to participate in a reception for our summer exhibit; *From DNA to Beer: Harnessing Nature in Medicine and Industry*.

The Unsung Heroes of the Little Free Library

Murphysboro High School students enrolled in MHS Construction 2 class were spotlighted in March on a local news channel as “Unsung Heroes.” Their outstanding job at designing and building a Little Free Library for the Medical Resource

Center was highlighted in the piece.

The students came together as a class and as friends to create the library. Their teamwork and creative talents have provided an amazing Little Free Library for the

School of Medicine and Southern Illinois University’s community to share a book and take a book. The piece can be viewed at <http://www.wsiltv.com/story/31502788/unsung-hero-sius-little-free-library>
